Your Practical Guide to Saudi Arabia's New Era of Data Protection

Understand. Comply. Protect.

Once withdrawn, Saudi Arabia's Personal Data Protection Law (PDPL) promises to open a new era in cybersecurity and data privacy in the Middle East.

This law of general application will affect every single business in the Kingdom as well as most of those who do business in the Kingdom. No one will remain untouched by the PDPL.

Learn what you need to do to make your company compliant with the new law.

In the global march to recover privacy, cybersecurity has become a matter of the highest priority. Very public data breaches and cyberattacks have become routine. Companies have been forced to shut down while negotiating with cyberterrorists. Adobe, Facebook and other reputable companies have seen the privacy walls breached and their customer lists published on the Internet. Sony Pictures saw the publication of embarrassing intra-company emails and the leak of unreleased movies. In view of these and other criminal acts, legislators reached the obvious conclusion that both the private sector and government had failed in their obligation to protect personal data and something needed to be done.

Saudi Arabia's aggressive response is the PDPL.

This book, written by a long-time Saudi legal veteran, introduces the key provisions of the PDPL and surveys the Saudi data landscape, including:

CLOUD COMPUTING

Understand data storage, processing, and cross-border transfer requirements.

CYBERSECURITY

Align with the PDPL's security obligations and breach notification rules.

FINTECH

Navigate data protection expectations for financial technology and innovation.

BANKING

Comply with sector-specific rules and customer data protection standards.

DATA EXPORT

Manage international data transfers in line with Saudi regulatory requirements.

A timely, practical guide to Saudi Arabia's landmark data protection law. Essential reading for any organization operating in the Kingdom.

THE PRACTITIONER'S DEFINITIVE REFERENCE

The Complete Toolkit for Saudi Securities Licensing

Less than one hour of a Saudi attorney's time — yet everything you need to license a Capital Markets Institution in the Kingdom is right here.

Saudi Arabia's capital markets represent one of the most lucrative frontiers in global finance. But the path to a **Capital Markets Authority license** is littered with the failed applications of well-funded firms that assumed the process would be simple. It is not. The CMA requires a precise set of operating manuals, forms, and compliance documents — and they are not searchable on Google, regardless of how hard you try.

This volume compiles exactly those documents: the **CMA-approved templates, required manuals, and licensing forms** that every Capital Markets Institution must submit. Sourced from templates in active use in the Kingdom, these materials are the practitioner's shortcut through a regulatory maze that has defeated major consultancies and left sophisticated foreign firms still waiting for a license they could have obtained years ago.

A CAUTIONARY TALE FROM THE AUTHOR

A prominent Indian securities firm — and a Chinese broker armed with the latest AI search tools — both spent years attempting to obtain a Saudi securities license without these materials. Neither has succeeded. This book exists so you don't make the same expensive mistake.

The definitive English-language guide to Saudi Arabia's real estate revolution.

Essential. Practical. Authoritative.

Understanding Saudi Arabia's Real Estate Transformation

THE LAWS THAT CHANGED EVERYTHING

In 2013, Saudi Arabia introduced a package of nine new real estate and mortgage laws designed to modernize a property market that had operated under largely traditional legal principles for generations. These reforms transformed financing, lending, enforcement, mortgages, and property transactions throughout the Kingdom. For international investors and professionals, understanding these changes became essential.

WHY THIS BOOK MATTERS

Many of the new laws were never officially translated into English. Even experienced practitioners often struggle to answer fundamental questions:

- How is property transferred?
- How do mortgages work?
- How are debts enforced?
- What protections exist for lenders?
- How does the Saudi mortgage ecosystem function?

Saudi Real Estate Law and Practice provides clear answers.

The Secret Laws of Money

Preachers condemn those who would make money into a god, but if there is no God, there still is money.

No pursuit is as vital as the relentless chase of wealth. Greed, writes Felouz, is the only true vehicle to success.

This tongue-in-cheek guide breaks boundaries to expose secrets only the ultra-successful know: society runs entirely on capital. Like any language, wealth has a strict grammar. If you don't master its rules—including the dark arts of betrayal, cheating, and pure self-interest—someone else will gladly take your money from you.

About the Author

Felouz is the pseudonym of a former Wall Street analyst and trader who worked for some of the most recognizable names on the Street before being let go for unethical behavior.

INSIDE THE MEDELLIN CARTEL: CONFESSIONS OF THE LOGISTICS MANAGER

HIGH-LEVEL TRANS-SHIPMENT AND COCAINE ADVENTURES

Carlos Stier recounts his life as the logistics manager for the Medellin Cartel, managing the smuggling operations through South Florida, the Bahamas, and Cuba for the infamous Carlos Lehder. This unvarnished memoir reveals the high-stakes world of multi-ton drug drops and international coordination.

HIGH-LEVEL CORRUPTION AND GOVERNMENT BETRAYAL

From corrupted narco-lawyers to government officials, Stier exposes the deep-rooted corruption that fueled the cocaine trade. His confession holds back nothing, culminating in a breakdown of the organization. Stier began working with the DEA, targeting his old connections, unaware that one of them was a highly placed Cuban spy.

RAUL CASTRO AND THE BAHAMAS CONNECTION

Prepared for the spy's subsequent trial in Miami, this document names individuals like Nigel Bowe, the Cartel's man in the Bahamas, and, most shocking of all, details how Raul Castro received payments to permit Lehder's drug flights over Cuba.

LESSONS FROM THE NARCO-PENITENTS

This memoir, including an extensive new introduction, analyzes the complex factors that determine why some narco-informants receive lengthy prison terms while others are granted freedom, and why the associated spy trial was uniquely significant. It holds valuable lessons on classified information and geopolitical intelligence that remain critical today.

A FIRST-HAND ACCOUNT FROM THE GREEN ZONE

Law & Chaos in Equal Measure

AN AMERICAN LAWYER IN IRAQ

★ What could possibly go wrong? Apparently, everything.

An American attorney arrives in Baghdad's **Green Zone** to manage the office of a German law firm. The job description was straightforward. The reality was anything but. Between nightly mortar attacks, baffling bureaucracy, and an office phone that cuts out every time a military convoy rolls past, he discovers that practicing law in a war zone has its own peculiar rules — most of them unwritten.

Ten thousand tons of chicken vanish into thin air. A transgender government contractor finds unexpected sympathy among the ayatollahs. And somehow, the fights with the home office back in Germany feel more stressful than the rockets landing outside the window.

Absurd

A war diary that reads like a thriller and laughs like a comedy — because sometimes that's the only rational response.

Vivid

A rare insider view of the Green Zone during the final chapter of America's Iraqi adventure.

Human

Behind the geopolitics: real people navigating impossible situations with ingenuity and dark humor.

Honest

No spin, no ideology — just the unvarnished truth of what it meant to work, live, and survive there.

From the author of the best-selling **Doing Business in Saudi Arabia**, this practical guide cuts through the complexity to give foreign investors, attorneys, and business travelers a clear-eyed picture of the legal and commercial landscape — the rules, the risks, and the remarkable opportunities — in a country that is at once ancient and brand new.
